

NexusFusion Architecture

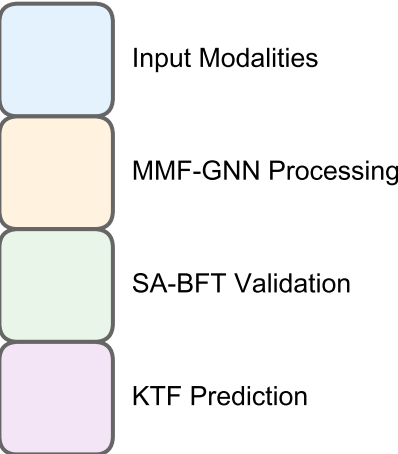

Multi-Modal Input Layer

Multi-Modal Autonomous Driving Neural Network

Architecture Components:

- Model Specifications:
- Total Parameters: 15.6M
 - Embedding Dimension: 256
 - Attention Heads: 8
 - Transformer Layers: 4 (each component)
 - Dropout Rate: 0.2
 - Training Device: Mac M4 GPU (MPS)
 - Best Validation Loss: 29.91

Output Results
